## Fire Safety Education

Each day over 3,000 individuals suffer a burn injury throughout the world. So many of these individuals become burn victims do not have the finances and medical insurance pay for and receive the needed medical treatment in order to recover. Within the USA an individual who suffers a burn injury on 80% of the body still has a great chance of living if they receive medical treatment in time. In a many countries around the world, the majority of individuals who suffer a burn injury that covers 50% or more of their body will not be treated and will not survive the burn injury.

**BSTTW** travels to these countries and offers medical treatment and medications to help as many individuals as possible.

**BSTTW** offers fire safety educational materials in over 15 different languages to help lower the number of fire, injuries, deaths and property damage.

[www.burnsurvivorsttw.org/list/firesafety.html](http://www.burnsurvivorsttw.org/list/firesafety.html)

In 2011 **BSTTW** released fire safety, firefighter and camping educational and coloring comic eBooks for children, families, schools, groups, communities, organizations and universities.
