## Fire Safety Education

Each day so many individuals suffer from a burn injury throughout the world. Many of these individuals who become burn victims do not have the finances and medical insurance to pay for and receive the needed medical treatment in order to recover. Within the USA an individual who suffers a burn injury on 80% of their body still has a great chance of living if they receive medical treatment in time. In many countries around the world, majority of individuals who suffer a burn injury that covers 50% or more of their body will not be treated and will not survive.

**BSTTW** travels to many countries and offers medical treatment and medications to help as many individuals as possible.

**BSTTW** offers fire safety educational materials in over 15 different languages to help lower the number of fires, injuries, deaths and property damage.

**BSTTW** offers fire safety, firefighter and camping educational and coloring comic eBooks for children, families, schools, groups, communities, organizations and universities.
