## BSTTW Board of Directors

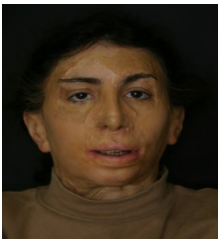

Michael Appleman is the CEO of **Burn Survivors Throughout The World, Inc. (BSTTW)**. He has been a burn survivor since May 1998. He suffered severe burns to his face, neck, hand, legs, ankles and feet. During his recovery, Michael decided to help other burn survivors and family members find their new path in life. Mr. Appleman has the will and ability to make the contacts needed in order to reach **BSTTW's** goals and desires. As a burn survivor and having a MS Degree in Counseling Psychology Michael is capable of understanding and offering the help needed to both burn survivors and family members.

Gary is the Vice President of **BSTTW**. He was the Founder of Burn Survivors Online, one of the first internet site support groups. Gary is also a Disabled Veteran with 18 years of service. Prior to suffering a burn injury Gary used to be a sponsored Motorcycle Road Racer (3 mile track with a top speed of 175 MPH). One day he came into the pit for refueling. When they dumped fuel in the tank it overflowed ran over and down his legs and a bit on his arm. When the fuel hit the red hot titanium pipes it ignited and caused Gary to suffer a severe burn injury.

Kathleen is the Secretary. Kathleen is a Speech Language Pathologist working at University of Texas Medical Branch as the Assistant Director of Speech Pathology and an Assistant Clinical Professor of Health Sciences and a clinical focus on acute care. She has over 25 years of experience in the field and has been working with patients with burns for 8 years.

Cindy is the Member at Large. Back in 1971, about three weeks before Cindy became twelve years old, Cindy and her brother decided to make some butter in a small metal measuring cup on the electric stove. Cindy was able to hear but most of her ears were burned away. After being in the burn unit for over two months Cindy was released and came home for Christmas. She was so happy to be home but was dealing with the burn scars and the loss of her ears. With a lot of help from her family and friends Cindy grew up and dealt with the life of a burn survivor.

## Fire Safety Education

Each day so many individuals suffer from a burn injury throughout the world. Many of these individuals who become burn victims do not have the finances and medical insurance to pay for and receive the needed medical treatment in order to recover. Within the USA an individual who suffers a burn injury on 80% of their body still has a great chance of living if they receive medical treatment in time. In many countries around the world, majority of individuals who suffer a burn injury that covers 50% or more of their body will not be treated and will not survive.

Around 374,000 house fires happen each year in the United States.

Fire prevention is especially important for vulnerable populations in terms of age, disability, and poverty. Fire is in 27th place on the top 30 list of biggest causes of death worldwide. In 2017, the Ivory Coast had the highest rate of fire deaths per year in the world, at 14.53 per 100,000 people. Angola and Sierra Leone had the next worst fire death rates in the world, at 11.18 and 10.86 deaths per 100,000, respectively. The US was in 136th place among 183 countries in the world, with a fire death rate of 0.73 per 100,000 in 2017.

BSTTW travels to many countries and offers medical treatment and medications to help as many individuals as possible.

BSTTW offers fire safety educational materials in over 15 different languages to help lower the number of fires, injuries, deaths and property damage.

BSTTW offers fire safety, firefighter and camping educational and coloring comic eBooks for children, families, schools, groups, communities, organizations and universities.

Even though the fire incidence and death toll trends are going in the right direction, the risk that we all run from fires remains real and dreadful, especially for those who are dependent on the help of others. We hope these figures will motivate you to stop taking chances and proactively prevent the hellish consequences that a fire may inflict on your physical, psychological, and material well-being, as exposed in these fire safety statistics leading up to 2021.
